[Anticoagulation Therapy - Clinical Decision Support, Effective 12.3.18](#)

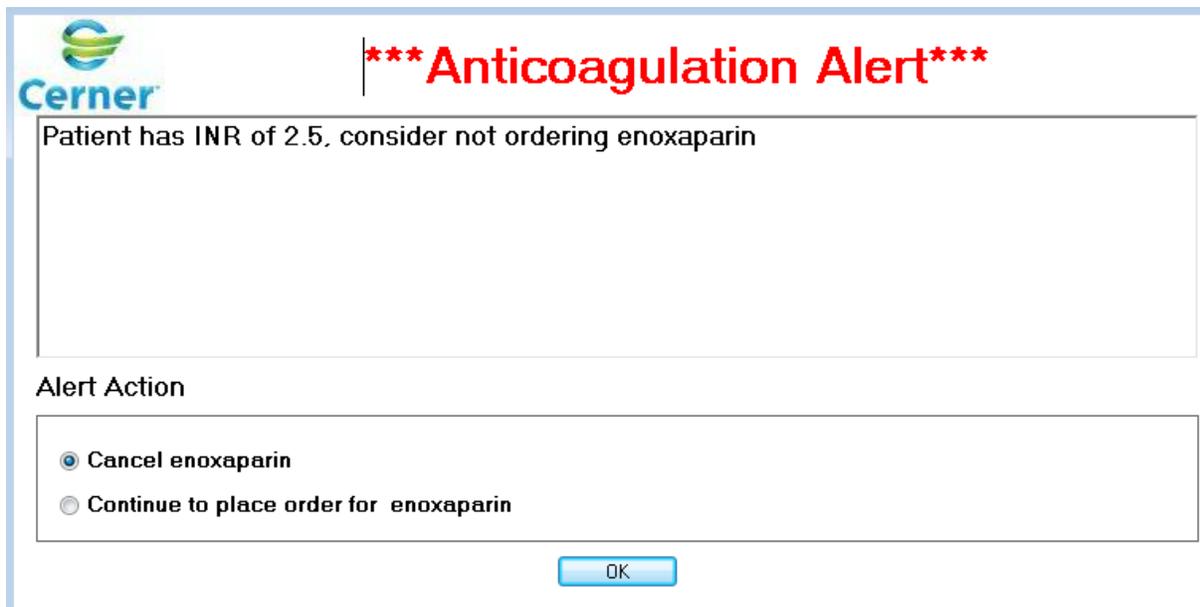

Starting 12.3.18, new clinical decision support will be implemented to assist with appropriate utilization of pharmacologic VTE prophylaxis.

When ordering SQ heparin or enoxaparin, a warning alert will fire in the following situations:

- INR > or = 2 (most recent result this encounter only)
- Platelet count < 100 (most recent result this encounter only)
- Active Hospital or Home Medication list contains rivaroxaban, apixaban, fondaparinux, or edoxaban

The alert defaults to cancellation of the order, but there is the option for continued placement if Provider feels it is indicated by the clinical situation specific to the patient.

Sample alert

The screenshot shows a Cerner alert dialog box. At the top left is the Cerner logo. To the right, the text reads: ***** Anticoagulation Alert *****. Below this, a text box contains the message: "Patient has INR of 2.5. consider not ordering enoxaparin". Underneath the text box is the "Alert Action" section, which contains two radio button options: "Cancel enoxaparin" (which is selected) and "Continue to place order for enoxaparin". At the bottom center of the dialog is an "OK" button.

The alert fires for Providers only, not nurses or others who may be initiating a PowerPlan or entering a TORB/VORB.

eRx destination on Depart Medication List, Effective 12.10.18

Enhancements to the Medication List in the Patient Discharge Summary of Depart will be made on 12.10.18. As shown here, **categories specifying both printed prescriptions and those sent to pharmacies will be listed**. Medications that were neither printed nor electronically sent will list beneath "Other Medications". (For example, a home medication that was not refilled during the encounter will be seen in the "Other Medications" section.)

MEDICATION LIST

Give a copy of this medication list to your Primary Care Provider.

If you have any medications at home that are not on this list, DO NOT take them until you contact your Primary Care Provider for clarification.

Contact your pharmacist or healthcare provider if you have any questions about these medications.
