

EHR Hospital Communication: April 11 2018

Please post / share this communication within 24 hours in your department/unit.

Remember: Many answers/clarifications on EHR processes can be accessed through the EHR Intranet site or EHR Learning (Learning Live)

❖ **Menu Modifier** *Available 4-12-18*

- Safety Trays
- The Safety tray modifier has been clarified to determine the difference between a safety tray due to behavioral needs versus swallowing concerns. Please note there are now two options in the *menu modifier* dropdown box. The options serve to differentiate the two main types of safety trays.
- *Safety Tray – Swallowing* will automatically have a vocera RN and may or may not have thickened liquids, require 1:1 feeding, impulsiveness with eating, etc.
- *Safety Tray – Plasticware* is defined as the patient receiving plastic utensils (no knife), plastic dinner ware (instead of ceramic) and cup (no cans).

Questions contact: Sandy Christoffel-Brewer: Sandra.Christoffelbrewer@ascension.org

❖ **Rebranding Reports in PowerChart** *Available now!*

- Some reports in PowerChart have been “rebranded” to include our new designation as Ascension Columbia-St.Mary’s Hospital. The reports most commonly used are the Diabetic Discharge Supplies form and the Patient Medication Schedule.
