

Please post / share this communication within 24 hours in your department/unit.

Remember: Many answers/clarifications on EHR processes can be accessed through the EHR Intranet site or EHR Learning (Learning Live)

❖ **Outside Records Mpage (Effective – September TBD)**

Outside Records Mpage will be available in September 2017.

This mPage will import clinic and hospital data from the Wheaton/Epic system for patients seen by Wheaton providers.

This functionality is still being tested and it is *recommended* that clinicians only view information at this time.

The technical ability exists to save a document and import data such as Problems, Allergies and Medications. Job-aid explaining the details and navigation of this MPage can be found [here](#).

Things You Need to Know:

- This mPage will conduct a query and pull data from the Wheaton/Epic system whenever an Athena/Invision encounter is created if the patient match criteria has been met.
- The patient banner will have an indicator letting you know if there are new records available since the last query was done.
- Data from the Wheaton/Epic query may include records from other outside facilities.
- The first query will look back 180 days and import data.
- Subsequent queries will look back 30 days from the last query.
 - If my first query is done Oct 1, the system will look back and pull data from 4/1/17-10/1/17
 - If the next time I open the record is Jan 1, the system will pull data from 9/1/17-1/1/18

For questions please contact IS Service Desk at 414-326-2400

❖ **MRI Safety Questionnaire (Effective - 8/30/17)**

The questionnaire has been updated

The updated form will make the patient survey process more efficient and will address recent technology updates.

If questions, contact Julie Kreckow julie.kreckow@ascension.org

❖ Updated Therapeutic Infusion Instructions To Meet TJC Requirements

(Effective – 9/6/2017)

Based on the TJC guidelines, therapeutic Infusion Instructions for all Titration Medication orders have been updated as per the following format:

- Initial Rate
- Titration Increment
- Titration Interval
- Max Rate
- Goal

In addition, for ease of ordering, most titratable infusions will have these parameters completed with default instructions. Default instructions were developed in cooperation with pharmacy and physician leaders. Ordering providers are always responsible for reviewing the infusion instructions and adjusting based on a patient's clinical situation.

If any the 5 elements are incomplete, the provider will need to be contacted for clarification.

Example:

▼ Details for **fentaNYL 2,500 mcg [12.5 mcg/hr] + Premix NS 250 mL**

Details Continuous Details Diagnoses

Base Solution	Bag Volume	Rate	Infuse Over	
Premix NS	250 mL	1.25 mL/hr	200 hr	
Additive	Additive Dose	Normalized Rate	Delivers	Occurrence
fentaNYL	2,500 mcg	12.5 mcg/hr		Every Bag
Total Bag Volume	250 mL			

Weight:

Infusion instructions

Initial Rate equivalent to Normalized Rate field above.

The following elements are required:

Titration Increment: 12.5 mcg/hr

Titration Interval: Q10 minutes

Max Rate: 200 mcg/hr

Goal: for RASS 0 to -1

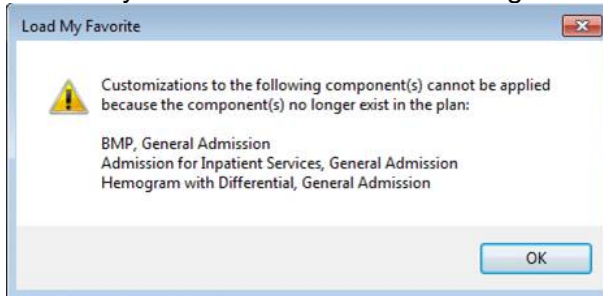

.....

CONC = 10 mcg/mL

For Question Contact John Canepa at John.Canepa@ascension.org

❖ Resaving Favorite PowerPlans

- Most required changes to **PowerPlans** will now automatically update previously saved favorites.
- An **Alert** will appear when a selected/checked Order from a saved PowerPlan favorite has been removed from the base plan.
- There will be no alerts for modified Orders, added Orders, or removal of unchecked Orders. Notification of these changes will be received through usual communication methods.
- When / if you receive an alert of a change:

- Click **Ok**.
- This will open your original saved favorite PowerPlan. This plan will no longer contain the removed order, but will maintain all other previous favorite customizations.
- Click **Save as My Favorite**.
- Click **OK**. Do not change the plan name prior to choosing OK.
- It will then state: a plan favorite already exists with that same name, Do you want to overwrite the existing plan favorite
 - Click yes

If questions, contact Julie Kreckow julie.kreckow@ascension.org
