❖ Enteric Coated Medication Change

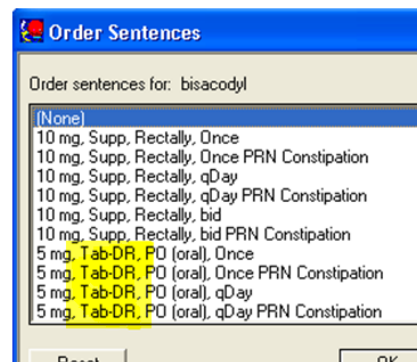

The medication drug form that displays within the sentence or clinical display line for enteric coated medications will be changed from “Tab-EC” to “Tab-DR” indicating a delayed release tablet. This is a required change because drug descriptions are being renamed by the manufacturers indicating delayed release as opposed to enteric coated.

THIS WILL NOT CHANGE POWERPLANS OR FAVORITES. The change will also not affect medication reconciliation and will not affect the function of single orders or Power Plans.

Order Sentence Display:
(Before change)

(After change)

MAR:

(Before change)

♂♂ bisacodyl 5 mg, Tab-EC, PO (oral), bid, Start Date: 04/15/13 17:00:00 CDT, Routine

(After change)

♂♂ bisacodyl 5 mg, Tab-DR, PO (oral), qDay, Start Date: 04/15/13 15:30:00 CDT, Routine
--

Order View (Before and After):

MAR Summary (Before and After):

MAR	♂♂	AFTER	@0900	5 mg @1605
MAR Summary	♂♂	BEFORE	@0900	@1700

New Patient Access, New Processes, New Geography, New Ways to Engage

❖ Inpatient Depart Enhancements – 1st Quarter Fix

What's not changing:

- How to chart notes, PowerForms and instructions in the left hand menu

What's being updated:

- Buttons along the lower right.
 - Current → 5 Buttons: Output Options, Print, Ok and Save, Sign, Close
 - Future → 1 button: “**Close Depart**”
****Note:** This is how all clinicians will exit out of depart.
- Wording of check boxes along lower left
 - Current → “Patient requested/received electronic discharge summary”
 - Future → “Patient requested/received discharge summary copied to a CSM issued USB flash drive”

What's **NEW!**

- New items to Patient Discharge Summary (viewable on right side of Depart window)
 - Addition of Patient Friendly Med List information
 - Dependent on completion of the *electronic discharge med rec* by the discharging provider
****Note:** if the electronic discharge med rec is not done, patient discharge medication will not pull into the Patient Discharge Summary document.
 - Reference ranges to BP, BMI and lab values
 - Weight in pounds
 - Patient demographics (Meaningful Use Stage 2 requirement)
- Final Sign and Print button within nursing tabs in the left hand menu venue
 - Nursing functionality only to be used when all discharge documents, orders and electronic discharge med rec are completed.
