

Please post / share this communication within 24 hours in your department/unit.

Remember: Many answers/clarifications on EHR processes can be accessed through the EHR Intranet site or EHR Learning (Learning Live)

❖ **Code Status in Banner Bar (Starting 10/29/13)**

Code Status will be visible in the banner bar on all hospital encounters. Code status will be linked directly to active orders and is encounter specific. Visibility in the banner bar will negate the need to search the orders profile.

Workflow Recommendations associated with this change:

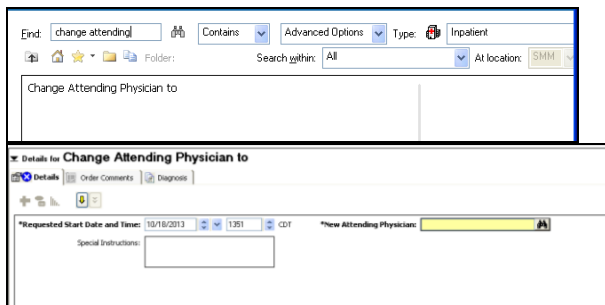

1. **"Multiple Orders"** –This will be a cue to providers to cancel inappropriate duplicate orders.
2. **"No active order"** – This will be a reminder to the provider to place the order if a discussion has been had with the patient but the provider forgot to place the order. Also, it may serve as a reminder to consider discussion and the subsequent placement of the order. While it is always the goal for all our patients to have code status orders clarified, documentation of code status is not a requirement for CSM patients unless they have a *known* DNR request.
3. **Peri-surgical areas** – Code status orders should be reflective of the discussion with the patient prior to surgery. Workflow guidelines to assist with this will be provided to surgical areas.

For Questions contact Dr. Wilkerson at 326-2167

❖ Attending in Banner Bar (Starting 10/29/13)

Attending Physician will be in banner bar on all hospital encounters. If the physician listed does not accurately reflect the current attending physician, an order should be placed to change the attending. This will task the HUC to update patient registration which will then update the banner bar.

❖ EHR Documentation “Refreshers” and Enhancements - **UPDATED** -

In an effort to streamline how documentation is performed in EHR and provide education tools for nursing units, Clinical Informatics and the Columbia College of Nursing has begun work on documentation “refreshers”.

The first web based training or “WBT” is **Medication History on Admission**. This outlines the meds history process from start to finish, including External Rx History button, Patient Pharmacy and Med List with Compliance. This “WBT” will be assigned to nursing and pharmacists.

A second “WBT” has been created on **Blood Transfusion Documentation*** in iView. Blood bank data collection shows fall outs in documentation of transfusion completion and signs of transfusion reaction. This outlines the enhancement requests made by nursing and the blood transfusion documentation process from start to finish.

***New functionality to be released Tuesday, November 19th**

Medication History on Admission – Nursing and Pharmacy

Who: Nursing and Pharmacists who perform Medication History*

What: Learning Institute, Course **0W0206**

When: **Assigned by October 31st. To be completed by December 31st.**

Blood Transfusion Documentation Process

Who: Nurses on units that perform blood transfusion and document in iView*

What: Learning Institute, Course number to be determined

When: **Assigned by October 31st. To be completed ASAP, due by December 31.**

*Staff completion, additions/removals (i.e. staff no longer employed, wrong staff assigned, new staff, etc.) to be monitored at the unit/department level.

New Patient Access, New Processes, New Geography, New Ways to Engage

❖ Adult Immunizations – Influenza and Pneumovax

- ❑ ****Reminder:** If the Influenza assessment within the **Admission History Adult** PowerForm was filled out on a patient prior to Oct. 1 and the patient is still in the hospital, an updated assessment must be completed. Per Patient Care Work Team a new **Adult Immunization** AdHoc PowerForm should be created instead of modifying the Admission History Adult form in Form Browser.
- ❑ **Completing Immunization Assessment**
As the assessment is completed, per Clinical Excellence, each yes/no question needs to be answered.

Blank Influenza section:

Yes No Previous

Yes No Vaccine a

Yes No Severe al

Yes No Patient R

Completed Influenza section:

Yes No Previous

Yes No Vaccine a

Yes No Severe al

Yes No Patient R

Blank Pneumovax section:

Yes No Age 65 y

Yes No Age 65 y dose

Yes No Age 18 y pneumoc

Completed Pneumovax section:

Yes No Age 65 y

Yes No Age 65 y dose

Yes No Age 18 y pneumoc

- ❑ ****Reminder:** In either section (Influenza or Pneumovax) checking yes at **Immunization Order**, places the actual order, routes to pharmacy and then will populate the MAR.

IMMUNIZATION ORDER:

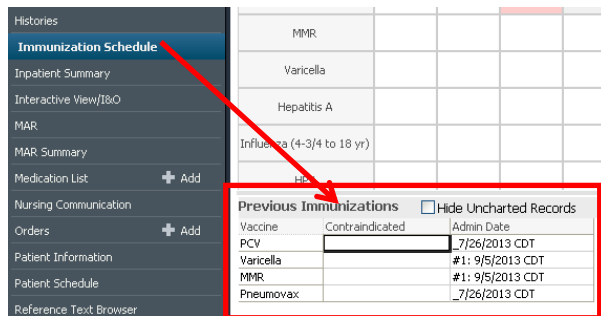

If NOT a candidate for vaccine, select "NO Influenza Vaccine indicated at this time due to contraindications noted in Assessment" (below)

Yes Influenza Vaccine 0.5 ml IM in deltoid times one in AM Order for vaccine will be placed if "Yes" is documented

No Influenza Vaccine not indicated at this time due to contraindications noted in Assessment

- ❑ **Immunization Schedule**

If at any time the Patient/Patient Caregiver is unsure when or if they received their last immunization, click on **Immunization Schedule** in the Venue Menu to review previous immunizations.

The screenshot shows the 'Immunization Schedule' menu item highlighted in blue. Below it, a table titled 'Previous Immunizations' is displayed with the following data:

Vaccine	Contraindicated	Admin Date
PCV		_7/26/2013 CDT
Varicella	#1:	9/5/2013 CDT
MMR	#1:	9/5/2013 CDT
Pneumovax		_7/26/2013 CDT
