

EHR Hospital Communication: 7-19-17

Please post / share this communication within 24 hours in your department/unit.

Remember: Many answers/clarifications on EHR processes can be accessed through the EHR Intranet site or EHR Learning (Learning Live)

❖ **Note type selection when scanning or creating new document**

- When selecting a note Type for scanning or creating a new document, only the first letter of the Type will now return selections
- Prior to the upgrade multiple letters could be entered to search for a note Type
- Typing “O” to search for “Order” now returns the selection below rather than allowing the user to type “Or” to bring up the note Type of Order
- IT is aware of this issue and is working on a resolution
