

Please post this communication within 24 Hours in your Department/Unit.

Remember: Many answers/clarification on EHR documentation processes can be accessed through the EHR Intranet site or EHR Learning (Learning Live)

❖ **Electronic Blood Procurement Request** (effective 2/14/13)

- Purpose: to streamline the blood product procurement process to electronic
- The electronic blood procurement request is a communication order to the blood bank
- This electronic order does not require a provider name or communication type
- It functions the same as the blood procurement paper half sheet. The preferred method to request blood is by utilizing the electronic order. The paper half sheet will remain available for Downtime
- Nursing places this order in the EHR when ready to administer blood product
- From the orders window, type in "blood pro" to find the Blood Product Procurement Request order

- Note the 5 required detail fields (in yellow)
- The Blood Product Quantity and Contact Phone are free text. Other fields are drop down menus

- Process for how you receive blood is not affected (tube system, in person)

New Patient Access, New Processes, New Geography, New Ways to Engage

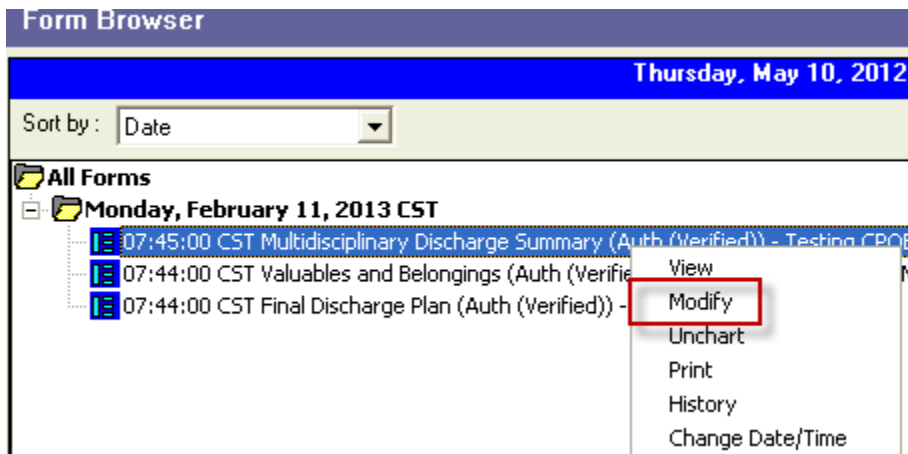

❖ Depart Buttons and Usage

- **Close** is the method for exiting out of Depart. Clicking Close will save any data that was entered while in the Depart document
- **Print** is used to print the Patient Discharge Summary. It is preferred you review the discharge summary electronically by taking a computer on wheels into the patient's room with you. Otherwise a draft copy could be printed and reviewed. You will use this button (again) after reviewing the discharge information with the patient/caregiver and checking the accompanying box. Click print (again) to print a final copy of the Patient Discharge summary

- **Sign** is the final step to complete the depart process. By clicking Sign, it submits a copy of the information given to the patient into the EHR as a permanent record of the depart information discussed with the patient and can be accessed from Documents. The actual time the patient left the unit should be entered into the Multidisciplinary Discharge Summary by going to Form Browser and modifying the form
