Collaborate with Provider to Manage Side Effects of Opioids - Done			✓	

**Intervention Description**  
Use Appropriate Self Report PT Pain Scale

- Coping with Labor Algorithm
- FPS-R: Faces Pain Scale - Revised
- Numeric Pain Scale

❖ **IPOCS Should NOT Be Saved as Favorites Important reminder!**

IPOCs, or the new electronic nursing plans of care, should NOT be saved as favorites. Joint Commission expects plans of care to be customized and individualized for each patient—saving “favorites” is contrary to that expectation. The ability to save an IPOC as a favorite exists because PowerPlans, which have a similar build, can be saved—in other words, we can’t take that ability away. Please continue to individualize the plans needed for your patient so that they reflect the excellent care being given.

❖ **IPOCS-Must Customize Patient Specific Goal or Intervention Important reminder!**

Do NOT document to a “Patient Specific Goal” or a “Patient Specific Intervention”. That documentation is meaningless! Customize the goal or intervention and then document to it.

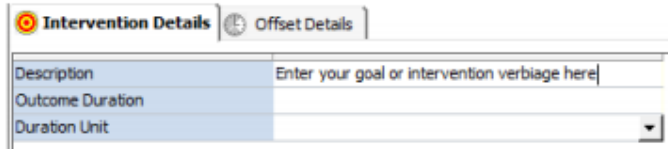

Goal/Intervention	Status	Date/Time
☉ Patient Specific Goal 1	✓	03/27/2018 12:28 CDT
Goal met	✓	03/27/2018 12:28 CDT
Progressing, continue	✗	03/27/2018 5:57 CDT
Progressing, continue	✗	03/25/2018 16:12 CDT
Goal met	✓	03/25/2018 10:31 CDT
Goal met	✓	03/23/2018 22:34 CDT
Goal met	✓	03/23/2018 12:02 CDT
Goal met	✓	03/23/2018 1:28 CDT

# EHR Hospital Communication: March 28, 2018

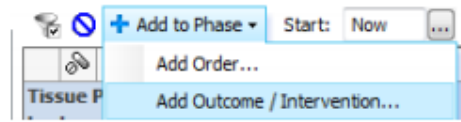

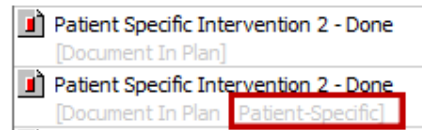

See below for a reminder of how to customize Patient Specific Goals/Interventions.

## To add Patient Specific Outcomes and Interventions

1. If you are still customizing a plan not yet initiated, you may find a Patient Specific Intervention or Patient Specific Goal already in the plan.
  - Check the box to select the item, then right click on it and select **Modify**.
  - Fill in details.
  - Continue selecting desired elements.
  - **Initiate** and **Sign**.

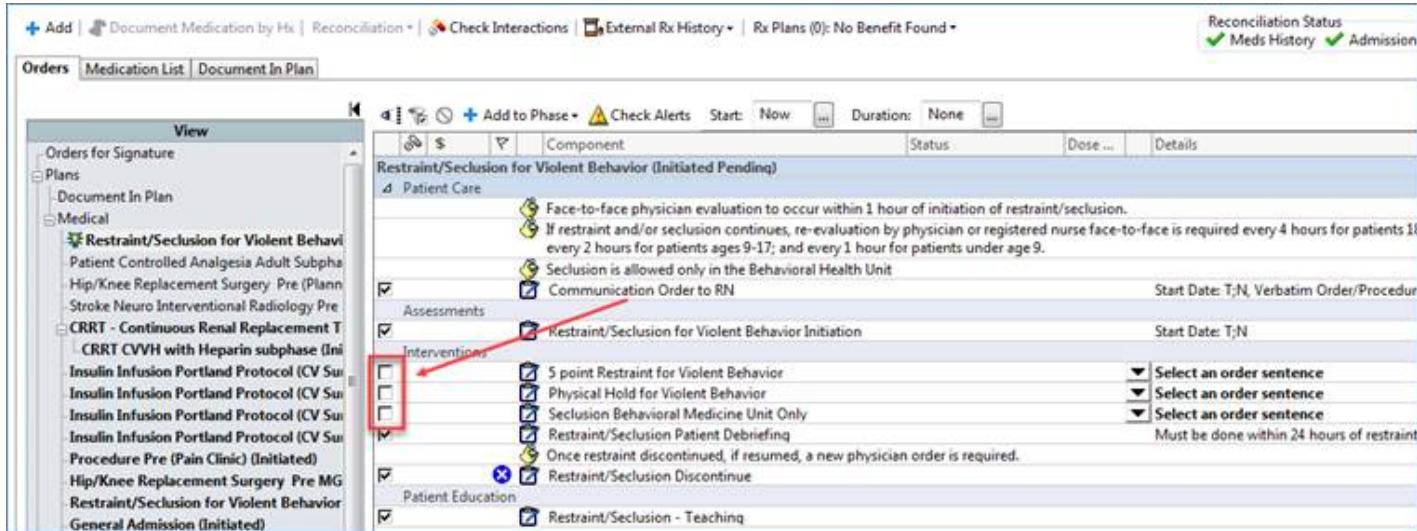

2. Otherwise, select the plan in the Orders Navigator (View).
3. Click **Add to Phase** in the toolbar and select **Add Outcome/Intervention** from the dropdown.
4. Type **Patient Specific** in the Search window and click the **Search** button.
5. Select the option that lists "Patient Specific" in gray under it or you won't be able to add a description.
6. Complete details in the box that opens.
7. Click **Orders for Signature**.
8. Click **Sign** and then **Refresh**.

For IPOC related questions, contact [Karen.Shapiro@Ascension.org](mailto:Karen.Shapiro@Ascension.org).

## ❖ Updates to Restraint/Seclusion for Violent Behavior Powerplan *(Effective Date - 4/2/2018)*

Restraint/Seclusion for Violent Behavior PowerPlan has been updated. Going forward the three options (5 point restraint for violent behavior, Physical hold for violent behavior, and Seclusion behavioral medicine unit only) will now remain unchecked. Before initiating the PowerPlan please select and check the appropriate Violent Restraint/Seclusion option.

The screenshot displays the EHR interface for configuring a Restraint/Seclusion for Violent Behavior PowerPlan. The 'Interventions' section is highlighted with a red box, and a red arrow points to the unchecked checkboxes for '5 point Restraint for Violent Behavior', 'Physical Hold for Violent Behavior', and 'Seclusion Behavioral Medicine Unit Only'. The 'Assessments' section includes 'Communication Order to RN' and 'Restraint/Seclusion for Violent Behavior Initiation'. The 'Patient Education' section includes 'Restraint/Seclusion - Teaching'.
