

Please post / share this communication within 24 hours in your department/unit.

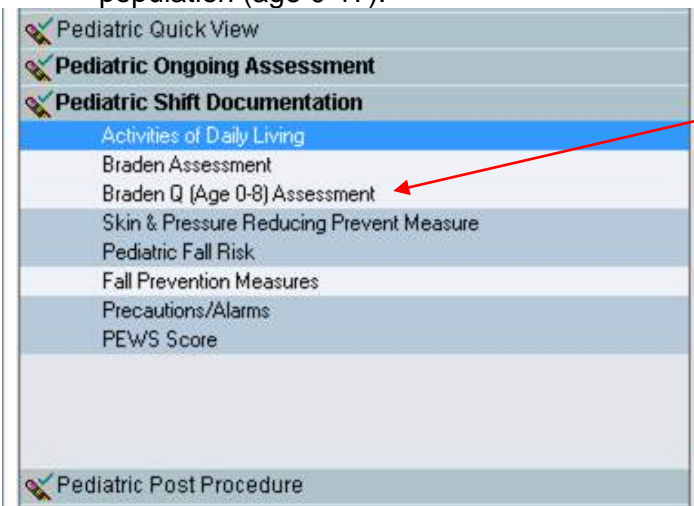

❖ EHR change requests (effective 12-14-17)

- Change request to be discussed at CIWT must be submitted to clinical informatics by end of day the Tuesday before the meeting
- Items submitted after deadline will be placed on the next meeting agenda
- See attached revised form
- Call clinical informatics for assist filling out the form

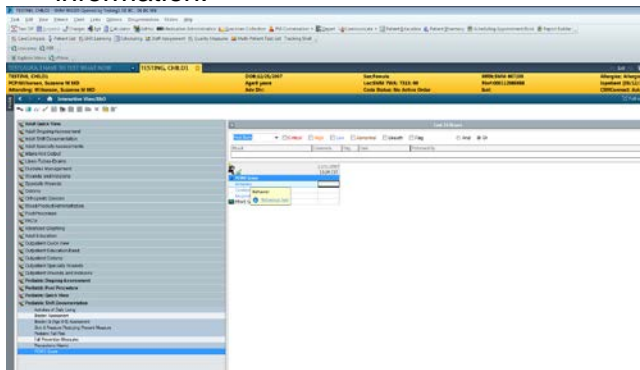

Questions, contact Julie Kreckow julie.kreckow@ascension.org

❖ Pediatric Documentation (effective 12-14-17)

- Braden Q Scale.
 - The Braden Q Assessment is recommended for usage on Children age 0-8 and the Braden Assessment on all other patients.
 - Text has been added to the Braden Q Assessment with recommended age group for easier identification of the correct skin assessment to be done on the pediatric population (age 0-17).

- PEWS scores
 - Reference text has been added to the PEWS score pediatric documentation to assist in the documentation and PEWS assessment on all pediatric patients.
 - To view the reference text click on the blue text and you will be taken to the reference information.

- **Admission History Peds Form**

- The 6-17 years developmental section of the pediatric admission form has been updated to allow for clear documentation of the required developmental assessment.
- A developmental assessment is a Joint Commission requirement for all pediatric patients.
- The additions include a statement of how the information was gathered with blue reference text.
- In order to not leave the boxes blank and show an assessment was completed addressing Fine Motor Concerns, Gross Motor Concerns, and Social/Communication Concerns: the None option has been added to allow for complete documentation.
