

EHR Hospital Communication: April 18, 2018

Please post / share this communication within 24 hours in your department / unit.

Remember: Many answers/clarifications on EHR processes can be accessed through the EHR Intranet site or EHR Learning (Learning Live)

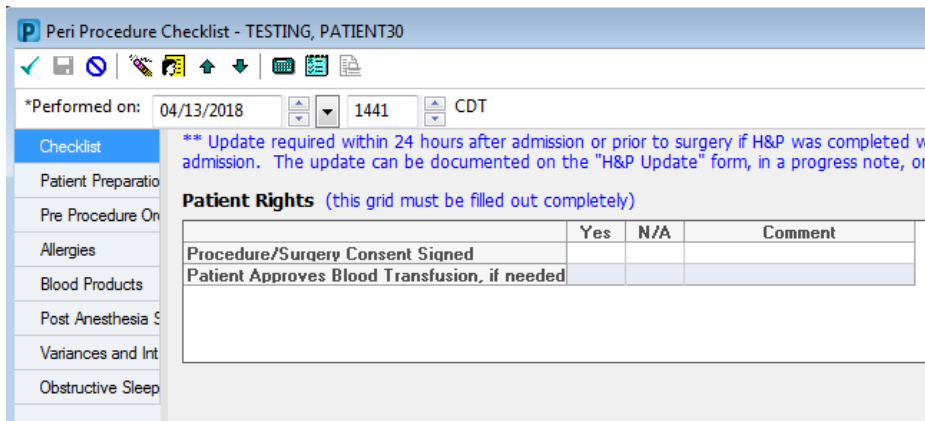

❖ **Rebranding and Patient Lists** *Available now!*

Due to rebranding, location lists in the EHR have changed. When creating a new list, be aware of this. Previously created lists are not affected if the location was a deeper level than the facility (i.e., unit lists).

❖ **Changes to Peri Procedure Checklist (Effective – 4/20/18)**

To reflect the policy change regarding informed consent, the item “Physician Informed Consent Verified” has been removed from the Patient Rights grid on the Peri Procedure Checklist PowerForm. The MD is responsible for ensuring this is done and documented in the EHR.
