COVID status in Banner Bar and Tracking Boards

Last week there were a couple associate communications regarding identification of patient COVID status on both the Tracking Boards (ED and Nursing Units) and the patient chart Banner Bar. Following is an update.

COVID status determination in Cerner looks back 21 days and across encounters. This supports identification of screening and testing that may be from another CSM location or encounter.

(Be aware: When a patient has had duplicate tests there have been inaccuracies noted. We are working on correcting this. In the meantime, if you do notice any inaccuracies, contact Dr. Wilkerson ASAP, pager 414-557-6860.)

Screening

“Screening” specifically refers to questions asked by RN at the time of patient intake.

Have you had a fever AND symptoms of a lower respiratory illness (cough, difficulty breathing, etc.)?

- Yes
- No

Ensure patient (and any guests accompanying patient) is wearing a mask that covers both nose and mouth. Separate them from other patients seeking care (i.e., waiting room or community area).

Testing

Whether intake screen is positive or negative, Provider assessment of the patient is more detailed than initial RN screening and is the final determinant of need for COVID-19 testing.

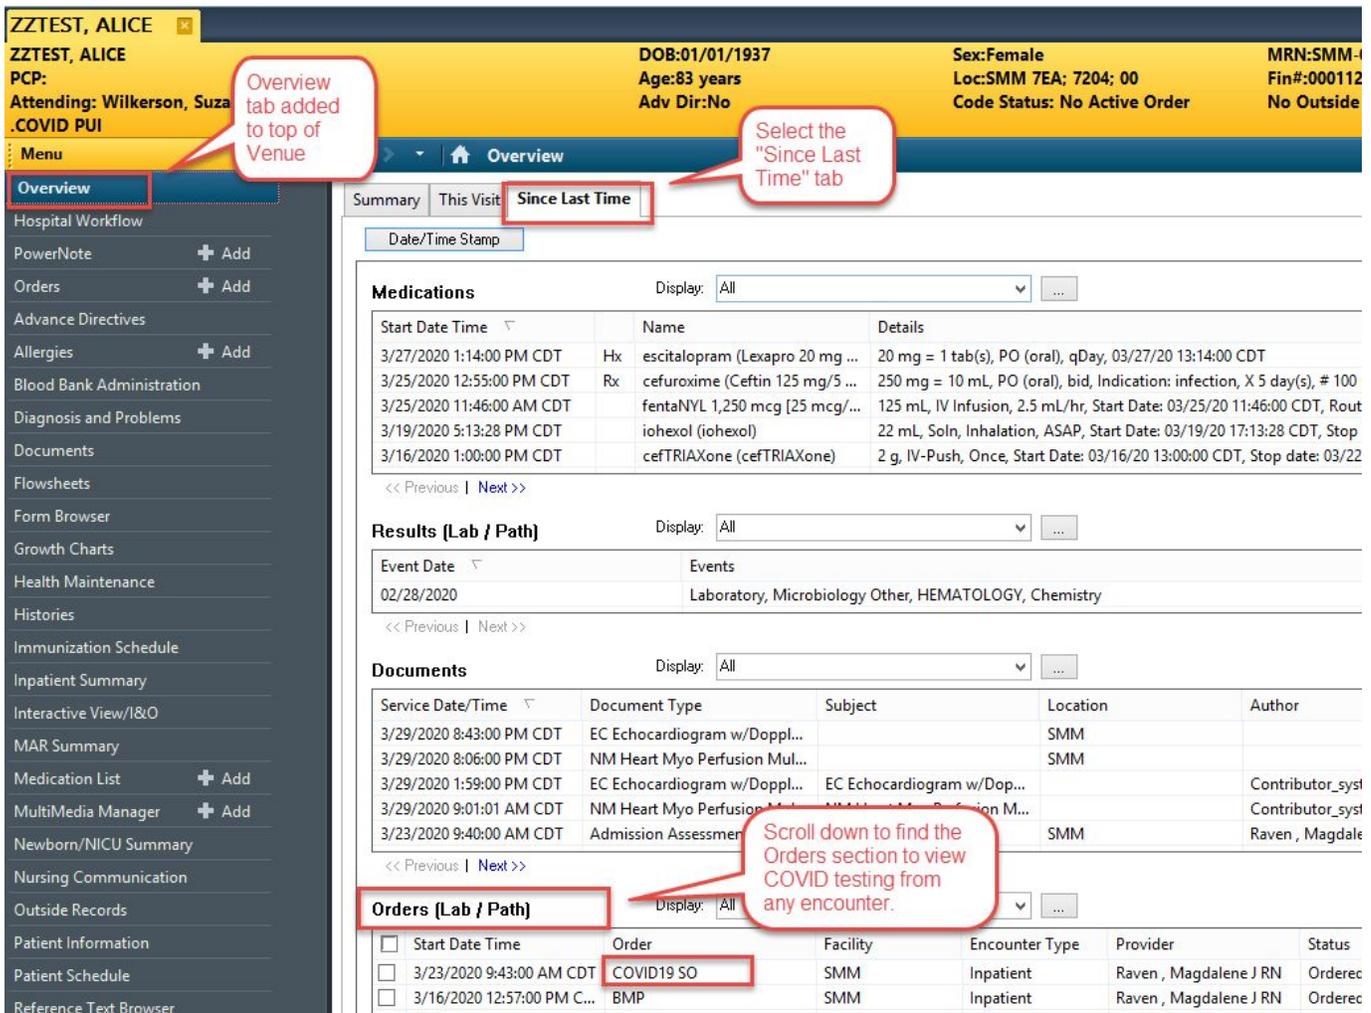

The guide on the next page explains both the Banner Bar and Tracking Board identifiers.

- Banner Bar text displays below the PCP. (Area blank if negative screen and/or no testing.)
- Icons are visible in the PI (Patient Information) column on the IP, ED, OB, and Perioperative Tracking Boards.

Abbreviation seen on the banner bar	Icon	Description
COVID: SUS		Indicates a person SUSPECTED of COVID-19. Appears when a patient has a positive COVID-19 <u>screening</u> .
COVID: PUI		Indicates a COVID-19 Lab test is ordered and pending result
COVID: POS		Indicates a confirmed POSITIVE COVID-19 <u>lab result</u>
COVID: NEG		Indicates a confirmed NEGATIVE COVID-19 <u>lab result</u>
COVID: SEE RESULT		Indicates a COVID-19 lab test has been resulted with a non-discrete result. Please review the chart for information.

Overview Tab, available 4.2.20

COVID-19 tests with pending results are challenging to find in Cerner as they are not visible in the lab flowsheet. The **Overview tab** allows quick access to details on tests that were collected during the current and previous encounters at Ascension CSM (ED, Urgent Care, Hospital, Drive through, etc.).

Local EHR Support

Local EHR support is available Monday through Friday from 8am to 4pm from Caitlin and Amy of the Clinical Informatics Team.

Connect with them directly at 414-585-6288.

They are also available by dialing Vocera and requesting "EHR support."

Ozaukee Vocera Phone: 262-243-6707

Milwaukee Vocera Phone: 414-585-1995

For urgent/emergent EHR technical assistance outside of the above hours, contact the Help Desk at 414-326-2400. When asked for an extension, choose "7" for expedited transfer to a service desk analyst.
