

Please post / share this communication within 24 hours in your department/unit.

Remember: Many answers/clarifications on EHR processes can be accessed through the EHR Intranet site or EHR Learning (Learning Live)

❖ Patient Friendly Med List

As of Tuesday, May 14th, the new Patient Friendly Meds piece has been added to the following Depart templates:

- BH Extended Care Facility Report
- IP Extended Care Facility Report
- NICU Care Transition Summary

❖ Review Process for New PowerPlans

Recently, there has been much work around creating new PowerPlans for the EHR. Many end-users will or may have already seen emails asking to review certain PowerPlans content. It is very critical to review and make comments within the link included on the email, so that changes can be made before being moved to the “live” environment.

You may make general comments or comments directly on a specific orderable. We ask that you make the majority of your comments on the appropriate order itself. This causes the least confusion to everyone else that is reviewing. Please do not email us your comments!

The review process crosses many disciplines throughout the organization including, but not limited to: Pharmacy, Nursing, Providers, Respiratory, Radiology, Nutrition, and Rehab. Who gets invited on a particular PowerPlan review depends on the type of PowerPlan that was created. Pharmacy does a quick review of every PowerPlan before it goes out to clinicians and providers. The review process may have 4-5 cycles of review, so you may be asked to review the same PowerPlan more than once. Again, it is important to keep reviewing since changes may have been made based on other reviewer’s feedback.

If you have questions or are interested in becoming a reviewer, please contact Julie Kreckow at jkreckow@columbia-stmarys.org.

❖ Adult Immunizations PowerForm Edits (starting May 20th)

- High risk factors shown on the Influenza PowerForm to also be added to Pneumococcal section of Adult Immunizations.
- Rewording of the 2 fields below it:
 - 2nd question: Age 65 years or older, and more than 5 years have passed since they received their first dose
 - 3rd question: Age 18 years or older and not previously vaccinated and is at risk of serious pneumococcal disease or its complications

The screenshot shows a web-based form titled "Pneumococcal Vaccine". It includes a header with "Adult Immunizations - T131 - SICKI" and a "Print" button. The form is dated "05/15/2013" and is by "Shank". The main content area is titled "Pneumococcal Vaccine" and lists high-risk factors for complications from influenza or pneumococcal disease, including age 65 or older, long-term care facilities, chronic diseases, kidney disease, diabetes, anemia, blood disorders, breathing problems, immunosuppression, cancer treatment, and smoking. Below this, there are three eligibility questions with "Yes" and "No" radio buttons:

- Yes No Age 65 years or older
- Yes No Age 65 years or older, and more than 5 years have passed since they received their first dose
- Yes No Age 18 years or older and not previously vaccinated and is at risk of serious pneumococcal disease or its complications

❖ **Blood Bank Product and Transfusion Subphase Edits** (starting May 21st)

On May 21st, changes will be made to the Blood Bank Product and Transfusion Subphase:

1. New Blood Bank Orderable: Massive Transfusion Blood Bank Workup
 - Blood Bank will dispense 6 PRBC uncrossmatched. 6 FFP and 1 Platelet will be dispensed as soon as prepared.
 - Each additional PRBC dispensed will also have 1 FFP dispensed. After every 6 PRBC, one Platelet will be dispensed. After every 12 PRBC, one 10 donor Cryoprecipitate will be dispensed.
2. New Unit Status: Uncrossmatched
 - Uncrossmatched is listed as a unit status choice when ordering any red blood cell product.
3. New Reference Text for Blood Products
 - New reference test can be seen when ordering each blood product.

❖ **New Therapeutic Phlebotomy PowerPlan** (starting May 22nd)

- A new PowerPlan for Therapeutic Phlebotomy has been designed, reviewed and approved by providers.
- Along with the new PowerPlan, a new orderable called “Blood Removal” will be built. This will address how much blood is to be removed from the patient. This can be both in the PowerPlan and also used Ad Hoc.

After final approval by Patient Record committee, will be available for use in EHR May 22nd
