

Please post this communication within 24 hours in your Department/Unit.

Remember: Many answers/clarification on EHR documentation processes can be accessed through the EHR Intranet site or EHR Learning (Learning Live)

❖ Dose Range Alert for DTap Ped (effective 2/14/13)

- When ordering a tetanus injection and choosing DTap ped on a patient over age 11, a new Dose Range Alert pop up will occur upon signing the order
- The purpose of this Dose Range Alert is to indicate to the provider that the immunization ordered may be an incorrect choice for the patient based on the patient's age
- The provider will then have the ability to cancel the order, ignore the alert, or modify the order then select OK to proceed

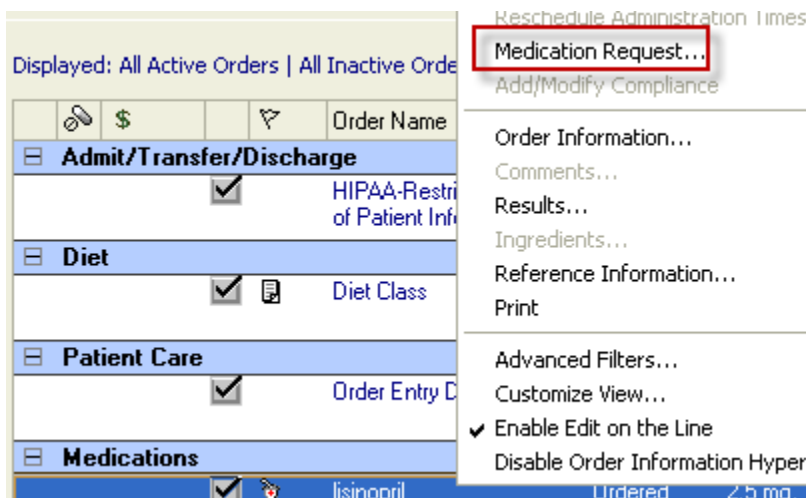

(Continued)

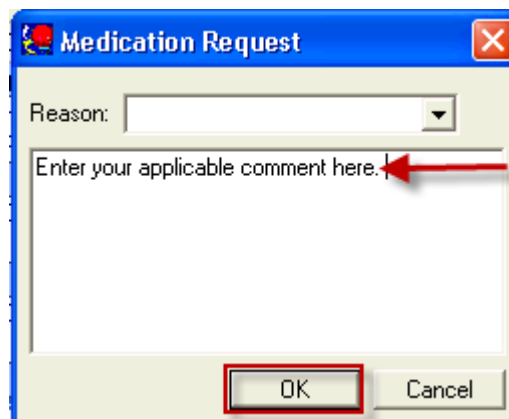

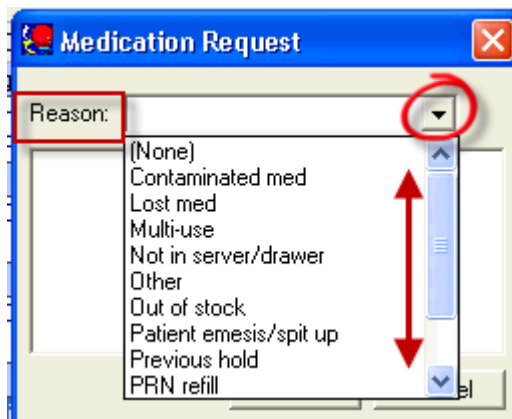

New Patient Access, New Processes, New Geography, New Ways to Engage

❖ Electronic Medication Request (beginning 2/11/13) (attached job aid)

- Pilot at CSM-M 7th floor was a success and will now be moved to standard practice to other units
- This functionality excludes units/departments that do not utilize the Green Sheet for communication to Pharmacy (example: River Woods, Emergency Department). These areas will continue current practice for communication to pharmacy
- There are 3 areas available within the EHR for electronic medication request. All follow the same process for the pharmacy request
 - MAR
 - Orders Profile (example below)
 - Medication List

- **Right-click** on the medication required > chose **medication request** > medication request box will open > Choose “**reason**” from the drop down menu > enter any applicable **comments** (such as medication dropped, patient vomited, etc.) > click **OK** > request will be routed to pharmacy
- Any electronic requests coming from an area not using this functionality will receive a call from pharmacy and the unit’s process will be used
- Electronic Medication Requests are not tracked in the EHR

Patient Record Committee (one liners)

- ❖ New PowerPlan: CT Heart Complete, without scoring Subphase
- ❖ The abbreviations EB/EOB will now be spelled out “every bag” or “every other bag” in an order sentence (directions)
- ❖ The diabetic discharge supply prescription has been updated
